

us logic *Delivering Objective Datacenter Solutions*

US Logic is a trusted IT partner for organizations of all sizes, from the mid-market to the Fortune 50. We work closely with our clients to identify how we can best serve them, and ultimately save them money on the cost of datacenter requirements. The relationships we have built with key manufacturers allow us to bring a strategic approach to our client's business and provides us with a competitive advantage over other suppliers. US Logic is the objective resource that our clients use to compliment their business by delivering comprehensive solutions and saving budget dollars.

New & Recertified Hardware

US Logic offers both new and recertified hardware products. All hardware solutions are fully tested, configured, and packaged to the manufacturer's standards. All hardware sold carries a full warranty and is guaranteed maintenance eligible. Same day shipping is also available.

Service & Support

US Logic offers service and support solutions for all major manufacturers, this includes:

- Nationwide Support
- 24 x 7 x 365 Monitoring
- Vendor Neutral Hardware and OS
- Support Wintel, UNIX, and Linux
- On-Site Spare Parts Depot
- Online Call Submission and Tracking
- 100% On-Shore Infrastructure
- Disaster Recovery Services

Product Life Cycle Management

US Logic can assist in the management of your datacenter infrastructure as it goes through its life cycle. Together, we can review the financial, contractual and inventory function of each unit and offer dollars for the inventory that still has value. We can then determine the next steps for the removal of your decommissioned assets.

Supplier Diversity

Via a joint venture, US Logic's products and services can be distributed through our partner Legacy IS LLC. This enables our clients to purchase from a Certified Minority Business Enterprise. Legacy IS LLC certifications include: NMSDC Certified MBE, SBA HUB Zone approved, CCR and Austin Tetra registered, Minority Business Enterprise (Certification from NMSDC). Disadvantaged Business Enterprise (DBE) (Certification from SEPT and PA UCP Program)

Delivering Objective Datacenter Solutions

Supplemental IT Purchasing Strategy (S.I.P.S.)

US Logic utilizes S.I.P.S. to compliment the channels and partnerships you already have in place. The SIPS Program enables our clients to utilize best practices when sourcing IT Hardware Products and related Services while providing:

Cost Savings:

Save 10% to 50% NO CONTRACTS

Datacenter Hardware:

- New and Recertified.
- Enterprise, Mid-range and Entry-level products.
- Server, Storage, Networking, Peripherals and Components from all the manufacturers.
- All hardware includes full warranties and guaranteed service eligibility.

Multi-Platform Support:

Our Maintenance/Support Contracts cover both the hardware and the OS (operating system), from 24x7 onsite support and sparing to individual T&M calls.

Product Lifecycle Management:

US Logic can assist in the management of your datacenter infrastructure as it goes through its life cycle. We can offer dollars for the inventory that still has value, and provide disposal for decommissioned assets.

Staffing Solutions:

We can provide qualified technical persons for: contract, part time, and permanent positions

Diversity Spend Credit:

Option to purchase from NMSSDC Certified MBE and SBA HUB Zone approved firm.

The S.I.P.S. program enables our clients to strengthen their existing practices and develop a plan of action that maximizes cost savings and product life cycle.
